Compost and Sewage utilisation Scheme in Mysore city

From

The Municipal Commr Mysore City Mlly no C2 P 54/52 53 dated 6.11.52

Forwards Resolution dated 5.11.52 of the municipal Council agreeing to implement the Scheme given by Dr Talati

---

The Statement of details of the Scheme sent enclosed to the Commissioner's letter contains a mere outline, lacking without the necessary data for the lumpsum provisions made. Further, the minutes of the discussions which Dr Talati had with the local authorities at Mysore is not made available to know in sufficient detail the nature design and other particulars of the Scheme that may be necessary for a better appreciation of the position

2) The municipal Council is agreeable to implement the Scheme proposed by Dr Talati which is estimated to cost Rs 80 000/ and wants the Govt of India to be approached for a loan of this sum which they undertake to discharge in 8 annual instalments

3) The Mysore city municipal Council has not been entering into an arrangement with the Bank of Mysore for accommodation on an overdraft basis to the extent of Rs 5 lakhs at the Reserve Bank Rate subject to a minimum of 4% and to utilise the amount for the laying of all important Roads the

60 56 pml

Compost and Sewage collection Scheme in Mysore city

— 2 —

Resources of this municipal Council are by no means exhausted. It is therefore requested to be considered whether the municipal Council would be in a position to pay the annuities on this proposed loan and also pay for the overdraft credit to be obtained from the Mysore Bank

4) The water supply in the city is also not very satisfactory and as an immediate measure a Rs 36 lakhs est water supply Scheme has been sent up to Govt which is under investigation in the P W Secretariat and for which also, the municipality will be in need of aid from Govt both by way of loan and grant All these may prove too great a commitment for the municipality to bear though in the flush of enthusiasm they may decide on taking up simultaneously all such expensive Schemes

5) Before the Civic Govt be approached for a loan on this account, it may be desirable to have details of how Sewage in the city is now being collected what income the municipality is deriving therefrom, at present and whether the present Scheme given by Dr Talati if put through would yield additional income to the municipality and if so to what extent with a view to studying its economics

6) The main purpose of Dr Talati's Scheme is the expansion of the production of Coir post manure Hence the response from agriculturists to using this manure who are traditionally accustomed to our Cowdung manure

Compost and Sewage actualisation Scheme in Mysore city

is also a factor to be reckoned before venturing on this Scheme as the Rate papers money cannot be frittered away on pet Schemes and ideals careless of the larger interests of the people and the public are to be really benefitted by it -

7) The proposal of the municipal Council is for orders

Ras
17/11/52

8) Dr Palat placed a letter to Mysore city and explained the position & special meeting of the Mcl was held on which was Resolved that the Govt of India be requested to sanction a loan of Rs 80,000/- Repayable in 8 annual instalments i.e to say, the amount to be paid every year will come to Rs 10,000/- only and the Mysore City Mcl will be able to pay this small sum of Rs 10,000/- every year, as this money that will be realised from the disposal of this manure will also enable the City to pay the instalment without any difficulty. Therefore a Recommendation may be made to Govt of India as requested by the Mcl Council

Sir,

Subject:-Compost of Sewage Development Scheme

With reference to your letter No L 12021-27/ dated 28th October 1952 and also the phone message dated 3rd November 1952, intimating about the programme of Dr Talati, M Ag ,Ph D Sewage and Compost Development Officer, Government of India to this city on the 4th instant, I write to state that the Officer paid a visit to the Municipal Farm on the 4th November 1952 and examined the question of Sewage Development in Mysore City in detail He has given a scheme for the utilisation of the Sewage at a cost of Rs 80,000/- the details of which are enclosed The scheme was explained by Dr Talati to the Council at a Special meeting on 5-11-1952 It was unanimously agreed that the scheme may be implemented by obtaining a loan of Rs 80,000/- to be given by the Government of India repayable in eight annual instalments The Council have accordingly resolved to request the Government to be pleased to recommend for grant of the loan A copy of the resolution is enclosed together with the four copies of the usual proforma required in connection with the above for necessary action I request that orders of Government obtained in this behalf may be kindly communicated early to take necessary steps to implement the

Compost by Sewage development Scheme

Serial No

From the President Hyderabad Municipal Council no C2 PR 54/52-53 dated 28-4-53 Requests orders re grant of loan of Rs 80000/- by Govt of India for the Scheme

From The Municipal Commr Hyderabad Cantonment Dy no C2 PR 57/51 2 dated 11-5-53 Requests sanction to the purchase of a Fergusson Tractor which is necessary for the complementation of the Scheme to bring under Cultivation 100 acres of Municipal Farm Lands

4) From the Commissioners report it is seen that a Central Grant of Rs 80000/- has been made to the Hyderabad Municipality under the G M F scheme for the Sewage disposal Scheme furnished by Dr Talati Nos G O distributing the Central grant must have issued from the A & F Branch A Copy of this G O has not yet been made available for the reference of this Branch

5) The work of the Scheme has to commence immediately as reported by the Commissioner In this Connection a Fergusson Tractor at a Cost of Rs 12,065/- is proposed to be purchased by the Municipality This has been approved by the Municipal Council also

6) The Commissioners report does not specify whether the Cost of the Tractor has to be charged to the Central Grant or to the Municipal Funds

Purchasing a Tractor being a part of the G M F Scheme, it may perhaps be not objectionable to debit the cost to the Central Grant The Secretary A and F may perhaps be requested to offer his remarks on this point

7) The Municipal Council is taking an advance to the extent of Rs 6 lakhs from the Bank of Mysore on an overdraft basis for the Scheme of tarring roads The water Supply Improvement Scheme in the city which is under consideration may require the M Council to raise a loan These Commitments may make it difficult for the M Council to find funds to invest on the tractor

8) A draft letter to the M Commissioner enquiring whether the cost of the Tractor is to be met out of M funds or from the grant and if it is from the former whether necessary provision has been made in the Budget is put up for approval or other orders

Dear sir,

Subject Purchase of a Ferguson Tractor.

In inviting your kind reference to this office letter No C2 PR 57/51-52 dated 8-10-1951 forwarding the resolution of the Council dated 6-8-1951 regarding the purchase of a Ferguson Tractor (copies enclosed for ready reference) I write to state that the purchase of a Tractor has become an urgent necessity in view of the recent communication from the Bio-Chemist to the Government Compost Scheme, to the effect that the Government of India in the Ministry of Food and Agriculture, are making available a loan of Rs 80,000/- asked for by the Municipality for the implementation of the scheme, to bring under cultivation an extent of land of about 100 acres ~~in extent~~, in the eastern sector of the Municipal Farm immediately Unless a Tractor is used it may not be possible to push through the scheme at an early date There is still an equal extent of land on the north-western segment which could also be brought under cultivation It is seen from the communication No FC 655-59/C 3 dated 5-5-1953 sent to you by the Commissioner for Food Production and copied to this office, that the schemes are submitted to Government for sanction It is understood from the report of the Municipal Engineer who had been deputed to meet the Additional Secretary to the Government of India - Sri Datar Singh on 30-4-1953 that the first progress report has to be sent by the 1st of June 1953 and that the Additional Secretary would be going over to

this city on the 23rd of this month to examine ~~ex~~ the question of providing additional funds fo the constructi of a septic tank etc

In these circumstances I request you kindly to have the proposal of the purchase of the Tractor sanctioned immediately and communicate the same for further action

Yours sincerely

(N Lakshman Rao)

Subject Purchase of a Ferguson Tractor

In continuation of this office letter No C2 P 38/49-50 dated 2-1-1951 on the above subject I write to state that the purchase of a tractor having been felt necessary, the Council approved of the provision made therefor in the Budget estimates of the Municipality for the year 1951-52 under E 11-Sewage Farm

Quotations having been called for from the several firms dealing with Tractors offers were received from Messrs ebbs dealing with Ferguson Tractors Messrs Marshall Sons & Co , and William Jacks as noted in the margin The Council considered these offers along with that of Food Production Commissioner about supply of Fordson's Tractors at Rs 9,000/- payable in in 5 annual instalments at 5% interest After considering the several quotations they have resolved that Ferguson Tractor might be purchased in their resolution No 383/6-8-1951

1 M/s Jebbs with all equipments	Ferguson Tractor	The cost of the Ferguson machinery is Rs 12 065/- as per quotations received from Messrs Jebbs and Co
do	12 065/-	
2 M/s Marshall with equipments	13,950/-	
3 Messrs William Jacks Oliver Model Standard Tractor without disc harrow etc ,	9 300/-	It is to be stated that the recurring expenditure of hiring a tractor for ploughing the Farm lands comes to Rs 9925

as against a sum of Rs 7368/- if one is maintained by the Municipality itself as detailed below -

Charges if the tractor is hired		Charges if it is owned		
Total extent of the land in the farm	350 acres	I Establishment		
		One driver 75+15/-	= 90/- p m	
1st plough at Rs 7-8-0 per acre costs	Rs 2925/-	One cleaner 30+15/-	= 45	"
		One helper 25+12/-	= 37	
			172x12=	
2nd plough at Rs 10/- per acre	Rs 3500/-		Rs 2064	
		II Equipment		
3rd plough do	3500/-	1) 170 Gls of oil at 1-2-0 per Gal		192/-
Total	9925/-	2) 7 gls of petrol at 2-12-0 per gl		20/-
		3) Lubricant		30/-
		4) Depreciation charges		100/-
		5) Sundry expenses		100/-
			Rs	442x12
		= Rs 5304-0-0		
		Total I+II = Rs 7368-0-0		

Examined by

WD 01416—GPB—30 000—11-10-50

While there is a savings of Rs 2557/- every year there are other distinct advantages if the tractor machinery is owned by the Municipality It is not always certain that the tractor could be made available for the Farm all through the year by the Agricultural Department It is found from experience that the Tractors obtained from Agricultural Department are withdrawn suddenly even when only a portion of tilling has been made Further extra labour has to be provided for whenever the departmental tractor is obtained to make the lands fit for tractor cultivation while arrangements could be made with the existing labour alone to have the Tractor plough effected as and when it is required if a tractor is owned by the Municipality

The area ploughed also could be more, if the Tractor is owned and operated by Municipal agency Further the ~~possi~~ possibility exists of hiring out the tractor to neighbouring cultivators thereby realising revenue when the Tractor is not wanted for Municipal work There is good scope also for increasing the revenue of the Farm by enhancing the area under grass This can only be achieved if a tractor is readily available in the Farm

In view of all these circumstances I request that orders of Government may kindly be obtained for the purchase of a Ferguson Tractor as resolved by the council

The resolution of the Council dated 6-8-1951 is enclosed herewith for reference
